

Rocky Road Driving School, LLC.
OBSERVATION LOG

This form is designed to verify a student's **required observation of OTHER DRIVERS** during the time enrolled in Driver's Education and to help the new driver begin the process of becoming a safe defensive driver. These hours will take place **outside of** the standard in-car observations that occur during the normal instruction period of the class and behind the wheel training. This form must be filled out completely and correctly in order to allow for the time accumulated during the observations to count towards the Idaho GDL six (6) hour requirement. It must also be signed and attested by a licensed adult that is either the student's parent or guardian.

Directions: Fill in the information listed in the chart below. Accumulate the total time observed in the bottom right hand corner of the chart. Explain in detail the mistakes made by the driver behind the wheel as well as all other drivers sharing the road. *If only completing ONE hour, you must include at least 3 separate entries.*

DATE	VEHICLE	CONDITIONS	EXPERIENCE (mistakes observed being made by all drivers)	MINUTES
TOTAL HOURS OBSERVED				

I _____, attest to the fact that my student driver, _____, has actively observed various driving situations for a total of _____ hours. These accumulated hours, along with the time they observed in the vehicle with the Rocky Road Driving School instructor, have allowed them to complete the six (6) hours of observation of other drivers required, as mandated by the State of Idaho's Graduated Driver's Licensing program for completion of the Driver's Education process.
